

ABHISHEK RAMESHWAR HAIBATPURE

Udgir, Maharashtra, India | +91-9423697754 | haibatpureabhishek@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Electronics & Telecommunication Engineer with an Advance Diploma in Embedded Systems. Product Development Engineer at Smart Mark® with proven expertise in technical proposal development, production optimization, and field-based problem-solving. Published researcher with demonstrated leadership capabilities. Skilled in microcontroller programming and cross-functional collaboration.

WORK EXPERIENCE

Product Development Engineer | Marks Technosystems Pvt Ltd (Smart Mark®)

Jun, 2024 – Jan, 2026

- Conducted 15+ site visits to identify and resolve production bottlenecks; implemented field-validated solutions reducing on-site troubleshooting time by 30%.
- Analysed customer Request for Quotations (RFQ) and technical specifications to develop 300+ competitive proposals with cost optimization and solution design, improving win rate.
- Optimized proposal development and production processes by implementing standardized templates and workflows, reducing cycle time by 25%.
- Collaborated with design, production, quality, and sales teams to enhance product functionality and ensure 100% alignment with customer specifications.

TECHNICAL SKILLS

- Embedded Systems & Microcontrollers:** 8051, PIC18F4520, LPC2148, STM32 Microcontroller
- Design & Development Tools:** Proteus 8 Professional, Keil uVision, MPLAB IDE, Hardware-Software Integration, EazyADA Pro, STM32CubeIDE.
- Programming Languages:** C, Embedded C (bare metal programming).
- Operational Skills:** Technical Documentation, RFQ Analysis, Production Optimization.

CERTIFICATIONS & AWARDS

- Advance Diploma in Embedded Systems** | Teknomindz Institute of Advance Technology, Pune **Feb 2026 - Jun 2026**
- Rising Star Award – Smart Mark®** **April 2025**
Recognition for outstanding performance and rapid technical contributions.
- Academic Recognition – 2nd Rank, B.E. Electronics & Telecommunication**, Bharati Vidyapeeth College of Engineering **April 2025**

RESEARCH & PROJECTS

- Conversion of Mechanical Thermograph into Digital System** | India Meteorological Department, Pune **Apr 2024**
Project Lead | Published Research: [Indian Journal of Technical Education \(UGC-CARE Indexed\)](#)
Modernized legacy recording systems by developing an automated data-logging solution using VL53L0X ToF sensor and LCD, eliminating manual tracking and achieving real-time precision.
- ATM Interface Simulation** [Github](#) **Aug 2026**
Designed and simulated a bare-metal STM32 ATM controller in C, implementing a Finite State Machine with multi-peripheral interfacing (ADC joystick, 4x4 keypad, 8-bit LCD, multiplexed 7-segment display) and validating functionality in Proteus VSM.
- GPS Wildlife Tracking** [Github](#) **Sep 2026**
Engineered a bare-metal firmware featuring dual-UART GPS/GSM processing, an FPU-free integer geofencing algorithm for 40 sq km boundary tracking, and automated multi-modal alert systems.
- Smart Street Light Controller:** [Github](#) **Sep 2026**
Designed an automated, LDR-driven lighting system with real-time UART fault monitoring using a PIC18F4520 microcontroller and Embedded C.

EDUCATION

- Bachelor of Engineering (B.E.) – Electronics and Telecommunication** **2020–2024**
Bharati Vidyapeeth's College of Engineering, Lavale, Pune | **CGPA: 8.32**
- HSC - Electronics** | Maharashtra Udaygiri Mahavidyalaya, Udgir | **74.62 %** **2020**
- SSC - Vidya Vardhini High School, Udgir** | **85.00 %** **2018**
